

# St Astier Lime Paints

Traditional lime washes and paints have been in use for centuries, providing colour and vibrancy to building exteriors and interiors. This is a new range of traditional lime paints to suit many different backgrounds. Allowing scope for traditional finishes and colours to be used in modern as well as historic building exterior and interior design and decoration.

As well as colour and vibrancy, St Astier lime paints help buildings to breathe, readily allowing moisture to evaporate. The range of surfaces and backgrounds which can be painted with St Astier lime paints is far greater than normal lime washes although not every surface is suitable, many cement, concrete, gypsum, stone, brick and lining paper backgrounds readily accept St Astier lime paints.

Lime paints are not flat and dull, they reflect the changing light through the seasons and conditions during wet and dry periods.

Interior use of St Astier lime paint at Lavethan Mill

Supplied in clear tubs to prepare 2.5 litres or 5 litres of paint by adding water to the level marked on the tub. Suitable for brush or spray application.

Instructions and guidance as to suitable backgrounds and relative application is available from your local supplier.

St Astier lime paints are non-toxic and do not harm the environment.

**CONSUMPTION: 6 - 12 SQUARE METRES PER  
LITRE DEPENDING ON BACKGROUND**
